

Attaching the Guard to the De-icer

Turn the de-icer upside down and place the guard as shown. Rotate the short spring to thread it onto the guard and the straight section of the heating element. The spring should capture the cross-wire on the guard and be centered around the copper strap as shown.

To Attach the Guard to Model 15CA De-icer

Clip the short spring to leave two complete loops as shown. using a screwdriver, pry the spring around the guard and the center cross bar of the de-icer.
